Color Scheme

I have already made many sites with white background, and I am willing to make some changes and try something new, so I'll be making a website with a light black background and try use white as mainly the text color. Yellow will be used to put contrast and give it a trust fill.

Typography

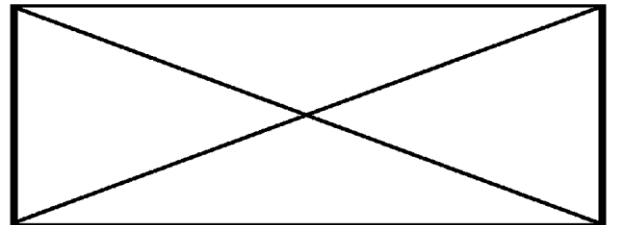

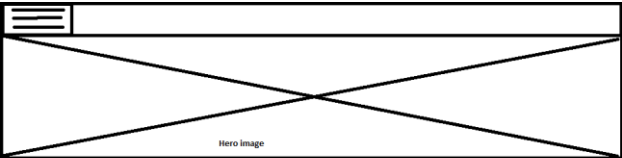

For <H1> and <H2> I will use `Nunito`.

They will vary between black, white and orange, depending on the background color

<P> I will use `Roboto`.

They will vary between black, white, depending on the background color
